

8. Write a program which creates two threads
one thread displaying "Bms college of
Engineering" once every ten seconds & another
thread displaying "CSE" once every two seconds.

```
public class ThreadExample
```

```
{
```

```
    public static void main (String [] args)
```

```
    {
```

```
        Thread thread1 = new Thread() ->
```

```
        {
```

```
            try
```

```
            {
```

```
                while (true)
```

```
                {
```

```
                    System.out.println("Bms college of  
Engineering");
```

```
                    Thread.sleep(10000);
```

```
                }
```

```
            }
```

```
        catch (InterruptedException e)
```

```
        {
```

```
            System.out.println("Thread interrupted  
: " + e.getMessage());
```

```
        }
```

```
    });
```

```
        Thread thread2 = new Thread() -> {
```

```
            try
```

```
            {
```

```
                while (true)
```

```
                {
```

```
                    System.out.println("CSE");
```

```
                    Thread.sleep(2000);
```

```
                }
```

```
            }
```

```
        }
```

}

catch (InterruptedException e)

{ System.out.println ("Thread interrupted" + e.getMessage());

}

});

thread1.start();

thread2.start();

}

}
